

## PRESS RELEASE

September 13 2018  
Grid Solutions, Inc.

Grid Solutions's Demand Response VEN (Virtual End Node) solution received an OpenADR2.0b profile 1.1 Certification

Grid Solutions, Inc. announced today that its demand response solution, **BlueDevils**, received an OpenADR2.0b profile 1.1 Certification.

### BlueDevils's Features

- BlueDevils is certified both in HTTP Pull and Push.
- BlueDevils can be set up as a stand-alone or a multiple-layer (VTN – Parent BlueDevils – Child BlueDevils). The latter hierarchical structure is suitable for an aggregator who makes DR transactions with sub-aggregators.
- BlueDevils can automatically filter DR events and distributes them to customers based on customers' attributes.
- BlueDevils has automatic Opt-in feature. This is effective for running a fast DR event (ex. 10min before, 30 min before, 1 hour before).

### OpenADR (Open Automated Demand Response)

OpenADR is an open and standardized way for electricity providers and system operators to communicate DR signals with each other and with their customers using a common language over any existing IP-based communications network, such as the Internet.
